2 Panel Insert

Instructions:
For use with Illustrator

1. Be sure that you design your artwork on the ARTWORK LAYER.
   Your background artwork should extend to the outer edge of the
   bleed area. Text must not be in the bleed area. (There should be
   at least an 1/8" gap between the spine, fold lines and text).
2. Outline fonts by selecting Type/Create Outlines from the Menu
   bar. (Note that you cannot edit text after it has been outlined)
3. Hide all layers EXCEPT Artwork Layer prior to saving your image.
4. Save as CMYK or spot color (not RGB), eps format, link
   files do not embed images.

Notes:
This template is for use with 1 or 2 panel insert. For a 2 panel insert
save two separate files labeled outer and inside panel.

Set up artwork to outer edge.
