

Fusion Powered Professional Duplication Systems

Fusion KVM

The Fusion KVM system is a PC based system that has an integrated Windows XP PRO PC inside the unit.

All you do is provide the Keyboard, Video Monitor and Mouse.

System Features Include:

- 2,4 or 6 - CD /DVD Combination Drive
- Unlimited Job Queuing locally or across network
- Can be configured as a Print-Only Station
- 250 to 900 disc spindle capacity (*depends on printer selection*)
- Accommodates Thermal or Inkjet Printer (2 and 4 Drive Only)
- DiscWrite 2 Software
- Features exclusive Relay Mode — copy from multiple masters and change print images with no user intervention
- True asynchronous CD/DVD Duplicators Equipment— each drive operates and burns independently of the others
- Internal PC running Windows XP Pro
- 1 Year Warranty

Select Options Include:

- Data Image Editor
- Audio Image Editor

Advanced Professional Duplication

The Fusion KVM takes PC based duplication systems to the next level!

KVM has the PC motherboard built into the Fusion duplication system and runs the Windows XP Pro operating system. You no longer need to connect the duplicator to a PC.

Unlike external PC based systems, the drives are connected through the IDE interface as opposed to firewire. This provides for a much speedier transfer of data.

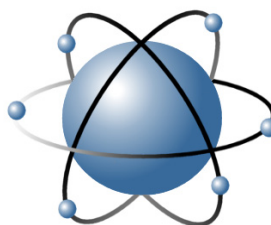

The KVM comes equipped with either 2,4 or 6 drives. 2 and 4 drive versions can be equipped with an inline Thermal or Inkjet printer.

Mediatechnic's Fusion KVM system is perfect for on demand duplication applications and can be networked into an existing network making loading and transferring files a snap.
